DM- DIGITAL MARKETING PLANNING & AI TOOLS

DIGITAL MARKETING OVERVIEW

1.List 5 digital marketing activities you think Zomato or Swiggy uses to attract new users, and briefly explain how each one helps the app grow.

1. **Social Media Marketing** – They use Instagram, Facebook, and X to post food content, offers, memes, and updates. This increases brand awareness and attracts new users.
2. **Discounts and Promotional Offers** – They provide first-order discounts, coupons, and special deals. These offers encourage people to download the app and place their first order.
3. **Influencer Marketing** – Food bloggers and influencers promote restaurants, dishes, and offers on social media. This helps reach new audiences and builds trust.
4. **Google Search Ads** – They show ads when people search for terms like "food delivery near me" or "order food online." This brings users who are already interested in ordering food.
5. **Push Notifications & Email Marketing** – They send personalized offers, reminders, and updates through notifications and emails. This encourages users to return to the app and make more orders.

2.Create a simple chart or table comparing any 3 digital marketing channels (like Instagram ads, YouTube influencer marketing, and Google search ads) for a new mobile app launch — include their main advantage and one possible drawback for each.

Comparison of Three Digital Marketing Channels

Digital marketing channel	Main Advantage	Possible drawback
Instagram Ads	Reaches a large and young audience with attractive visuals and videos.	Paid ads can become expensive with high competition.
Youtube influencer marketing	Influencers can build trust and demonstrate the app to their followers.	Results depend heavily on the influencer's audience and credibility.
Google search Ads	Reaches people who are actively searching for an ad	Competitive keywords can have a high cost per click.

3.Pick any app you use daily (such as Flipkart, Myntra, or Paytm) and write a short plan (5-6 lines) describing how you would promote a new feature using digital marketing methods.

Digital Marketing Plan for a New Feature in Myntra

I would promote a new **AI Outfit Recommendation** feature on Myntra.
First, I would create Instagram and Facebook posts showing how the feature works.
I would collaborate with fashion influencers to demonstrate the feature in short videos.
I would use Google Ads to reach people searching for fashion and outfit ideas.
I would send personalized push notifications and emails to existing users.
Finally, I would offer a limited-time discount to encourage users to try the new feature.

**4.Imagine you are launching a new music playlist feature for a Spotify-like app. Write a 5-step digital marketing plan to create buzz and get users to try it.

Hint: Think about using social media, influencer partnerships, email campaigns, or in-app notifications.**

Five-Step Digital Marketing Plan for a New Music Playlist Feature

1. **Create Social Media Buzz** – Post reels, stories, and short videos introducing the new playlist feature.
2. **Influencer Partnerships** – Collaborate with music creators and influencers to create and share playlists using the new feature.
3. **Launch a Hashtag Campaign** – Create a catchy hashtag and encourage users to share their playlists and music preferences.
4. **Email Marketing** – Send personalized emails to users recommending the new feature and explaining its benefits.
5. **In-App Notifications & Rewards** – Use push notifications to invite users to try the feature and offer badges, rewards, or special playlists for early users.

ONLINE MARKETING CONCEPTS

1.Pick any two apps you use daily (like Instagram, Zomato, or Flipkart) and identify one online marketing technique each app uses to attract new users.

Write a short explanation (2-3 lines) for each technique.

Two Apps and Their Online Marketing Techniques

Instagram – Influencer Marketing

Instagram works with influencers and content creators to promote features, Reels, and trending content. This helps Instagram reach new audiences and attract more users to the platform.

Zomato – Discounts and Promotional Offers

Zomato uses first-order discounts, coupons, and special offers to attract new customers. These offers encourage people to download the app and place their first order.

**2.Create a simple digital flyer (image or PDF) for a new food delivery app launch, highlighting at least three online marketing concepts such as referral codes, limited-time offers, or influencer shoutouts.

Hint: Use Canva or any free online design tool to make your flyer look engaging.**

3.List five types of online ads you've seen while using YouTube, Instagram, or any other app. For each, mention which platform you saw it on and what made it noticeable or skippable.

Types of Ad	**platform**	**What made it noticeable or skippable**
Skippable video Ad	youtube	Attractive opening or interesting video can make it noticeable; it can usually be skipped after a few seconds.
Carousel Ad	instagram	Multiple attractive images makes it noticeable
Story Ad	instagram	Full-screen videos and attractive visuals catch attention; users can skip by tapping to the next story.
Banner Ad	youtube	Bright images or special offers can attract attention,small banners are easy to ignore
Search Ad	google	It appears when users search for something they need, making it highly relevant; users can ignore it and choose an organic result.

4.Imagine you are launching a new playlist feature for a music app like Spotify. Write a short plan (5-6 lines) describing how you would use online marketing concepts (SEO, social media posts, email campaigns, influencer partnerships) to promote this feature.

Digital Marketing Plan for a New Playlist Feature:

1. **SEO:** Create blog posts and optimize the app's website using keywords such as “best playlists,” “mood playlists,” and “music for focus.”
2. **Social Media:** Post Instagram Reels, stories, and short videos showing different playlist themes and the new feature.
3. **Email Campaigns:** Send personalized emails to existing users introducing the feature and recommending playlists based on their interests.
4. **Influencer Partnerships:** Collaborate with music creators and influencers to demonstrate the new playlist feature.
5. **In-App Promotion:** Use push notifications and banners inside the app to encourage users to try the feature.
6. **User Engagement:** Encourage users to create and share their own playlists on social media using a campaign hashtag.

MARKETING PLANNING PROCESS

1.Pick any app you use daily (like Zomato, Instagram, or Paytm) and outline a simple marketing objective for that app, such as increasing user sign-ups or boosting in-app purchases.

App: Zomato

Marketing Objective:

The main marketing objective for Zomato is to **increase new user sign-ups and first-time food orders**. Zomato can use social media advertisements, influencer promotions, and first-order discounts to attract new customers and encourage them to place their first order.

**2.Create a one-page marketing plan for a new feature in a popular app (for example, a 'Dark Mode' in Myntra or a 'Group Order' feature in Swiggy). Include target audience, key message, channels you would use (social media, email, etc.), and a basic timeline.

Hint: Think about which platforms your friends use most and how you would reach them.**

Marketing Plan – Swiggy "Group Order" Feature

Feature: Group Order – Allow friends, family, or colleagues to add their food choices to one order.

Target Audience:
College students, working professionals, friends, and families who frequently order food together.

Key Message:
"Order Together, Enjoy Together – Everyone Adds Their Favourite Food!"

Marketing Channels

1. **Instagram & Facebook:** Create Reels, stories, and posts showing friends using the Group Order feature.
2. **Influencer Marketing:** Ask food and lifestyle influencers to demonstrate how easy group ordering is.
3. **Email Marketing:** Send emails to existing users explaining the feature and its benefits.
4. **Push Notifications:** Notify users about the new feature when they are likely to order food.
5. **In-App Banners:** Display the feature prominently on the Swiggy home screen.

Basic Timeline

Time	Activity
Week 1	Create teaser posts and announce the upcoming feature.
Week 2	Launch the feature with Instagram Reels, influencer promotions, and email campaigns.
Week 3	Run special offers for users trying Group Order for the first time.
Week 4	Analyze downloads, feature usage, orders, and customer feedback.

Expected Result:

The campaign should increase awareness and encourage more users to try the Group Order feature, leading to more group food orders.

3.List 5 possible digital marketing channels you would use to promote a new music playlist feature in a Spotify-style app, and write one line about why each channel fits the target audience.

Digital marketing channel	Why it fits the target audience
instagram	Young music listeners spend time on instagram,making reels and stories useful for promoting playlists
youtube	Music lovers regularly watch music videos and creator content
Email marketing	Personalized emails can recommend playlists based on users' music interests.
Influencer marketing	Music influencers and creators can introduce the feature to their followers and build interest
Push notifications	Notifications can immediately tell existing users about new playlists and encourage them to try the feature.

**4.Imagine you are launching a 'Refer & Earn' campaign for a cricket streaming app during the IPL season. Write down 3 measurable KPIs (Key Performance Indicators) you would track to judge the campaign's success.

Hint: Examples could include number of new users, referral code usage, or app downloads.**

Campaign: Refer & Earn during IPL Season

1. New User Sign-ups

Track the **number of new users who join the app through referral links or codes**.

2. Referral Code Usage

Measure **how many times referral codes are successfully used** by new and existing users.

3. App Downloads

Track the **number of new app downloads generated through the Refer & Earn campaign**.

These KPIs help measure whether the campaign is successfully attracting new users and increasing app growth.

VISIBILITY, TRAFFIC & USER ENGAGEMENT

1.Pick any one app you use daily (like Instagram, Zomato, or Myntra) and list 3 ways that app increases its visibility online (for example: trending hashtags, Google search results, influencer posts).

1.Influencer Marketing: Instagram works with popular creators and influencers who promote Reels, features, and trends. This helps the platform reach new audiences.

2.Trending Hashtags & Content: Hashtags, trending audio, and popular topics help content get discovered by more users and increase engagement.

3.Google Search Visibility: Public Instagram profiles and posts can appear in search results, helping people discover creators, brands, and content through Google.

2.Visit the homepage of Flipkart or BookMyShow and note down 3 features or sections that are clearly designed to boost user engagement (for example: flash sales banners, trending movies carousel, or personalized recommendations)

Three Engagement Features on Flipkart's Homepage

I checked the current Flipkart homepage. Three features that are clearly designed to encourage users to browse and interact are:

1. **Suggested For You:** Flipkart displays products based on what may interest the user. This makes product discovery more personalized.
2. **Deals and Offers:** Sections such as **Top Value Deals** and special offers encourage users to explore products and make purchases.
3. **Product Categories:** Categories such as Fashion, Mobiles, Electronics, Beauty, Home, and Appliances make it easy for users to explore different sections.

**3.Imagine you are running a food blog on Instagram. Write a sample post caption and 5 hashtags you would use to increase your post's visibility and drive more traffic to your page.

Hint: Think about what keywords or trends people are searching for when they want food recommendations.**

Craving something delicious? We've got you covered!

#FoodieIndia #Foodie #StreetFoodIndia #FoodRecommendations #FoodBlog

TRAFFIC

1.Open Google Analytics (or the demo account if you don't have a site), go to the 'Acquisition > All Traffic > Channels' report, and list the top 3 traffic sources for the past 7 days.

Organic Search – Users who reached the website through search engines such as Google.

Direct Traffic – Users who directly entered the website URL or used a bookmark.

Referral Traffic – Users who came to the website through links on other websites.

2.Pick any popular app or website you use daily (like Zomato, Instagram, or Flipkart) and identify at least 5 different ways users might land on their homepage (for example: organic search, direct URL, social media ad, referral link, push notification).

Five Ways Users Can Reach Zomato's Homepage

App/Website: Zomato

1. **Organic Search:** A user searches Google for "food delivery near me" and clicks the Zomato result.
2. **Direct URL:** A user types the Zomato website address directly into the browser.
3. **Social Media Ads:** A user clicks a Zomato advertisement on Instagram, Facebook, or another social media platform.
4. **Referral Links:** A user clicks a Zomato link shared on a food blog, website, or another online platform.
5. **Push Notifications:** An existing user receives a notification about a food offer and taps it to open Zomato.

3.Use ChatGPT or any AI tool to generate a list of 10 creative ideas to increase website or app traffic for an IPL cricket fan site. Copy the best 3 ideas into your notes and explain in 1 line why you think each would work.

Ten Creative Ideas to Increase Traffic for an IPL Cricket Fan Site

1. **Live IPL Score Updates** – Provide fast live scores so cricket fans repeatedly visit the website.
2. **IPL Match Prediction Polls** – Let users predict match winners, top scorers, and other outcomes.
3. **Fantasy Cricket Tips** – Publish useful team-selection and player-performance content.
4. **IPL Memes and Reels** – Create shareable cricket memes and short videos for Instagram and other platforms.
5. **Daily IPL News** – Publish quick updates about matches, players, teams, and injuries.
6. **SEO Match Articles** – Create articles targeting searches such as "IPL today match," "IPL schedule," and "IPL points table."
7. **Player Statistics Pages** – Create pages showing player records, scores, and performance.
8. **Giveaways and Contests** – Organize quizzes and contests with small prizes to encourage participation and sharing.
9. **WhatsApp/Telegram Updates** – Offer users the option to receive match scores, schedules, and important updates.
10. **Influencer Collaborations** – Work with cricket creators to promote the website and its latest content.

Best 3 Ideas

1. Live IPL Score Updates:
This would work because fans frequently check live scores during matches, creating repeat website visits.

2. SEO Match Articles:
This would work because people regularly search Google for IPL scores, schedules, points tables, and match information.

3. IPL Memes and Reels:
This would work because entertaining cricket content is highly shareable and can bring new visitors from social media

USER ENGAGEMENT

1.Pick any one app you use daily (Instagram, Zomato, Flipkart, etc.) and list 3 ways the app keeps you engaged (for example: notifications, daily streaks, personalized recommendations).

Three Ways Instagram Keeps Users Engaged

1. **Personalized Recommendations:** Instagram recommends Reels, posts, and accounts based on what users previously watched or liked.
2. **Notifications:** Instagram sends notifications about likes, comments, messages, followers, and new content, encouraging users to open the app.
3. **Stories and Reels:** Short, regularly updated content keeps users scrolling and checking the app for new posts and videos.

2.Design a simple Instagram-style poll for a story: create a question and two answer options, then write a short plan for how you would collect and display the number of votes for each option.

Instagram-Style Poll

Question: Which food should we review next?

Option 1: Burgers
Option 2: Pizza

How I Would Collect and Display Votes

I would add an Instagram Poll sticker with the two options. After posting the story, I would monitor the poll results and record the number or percentage of votes for each option. For example, if 60% choose Pizza and 40% choose Burgers, I would display the result in the next story as **"Pizza won with 60% of the votes!"**

**3.Write a sample push notification message that would encourage a user to return to a food delivery app like Swiggy or Zomato after 3 days of inactivity.

Hint: Think about using offers, reminders, or new menu items to make it engaging.**

Message : We Miss You! Get 50% OFF your next order

It’s been 3 days! Come back to discover delicious new dishes and enjoy your special offer. Use code: WELCOME50

4.Analyze the Flipkart app's product page and identify 2 engagement features (such as wishlist, ratings, or 'people also bought') and explain in 2-3 lines how each feature encourages users to spend more time on the app.

Two Engagement Features on Flipkart's Product Page

1. Wishlist

The **Wishlist** feature allows users to save products they are interested in for later. It encourages users to return to the app and can eventually motivate them to purchase products when prices or offers change.

2. Customer Ratings & Reviews

Ratings and reviews help users compare products and make purchasing decisions. Users often spend more time reading reviews, checking ratings, and comparing customer experiences before buying.

5.Use ChatGPT or any AI tool to generate 3 creative ideas for increasing user engagement in a music streaming app like Spotify, and write them down in your own words.

Three Creative Ideas to Increase Music App Engagement

1.Mood-Based Playlists:

Create playlists based on moods such as Happy, Chill, Workout, Study, and Travel. This makes it easier for users to quickly find music that matches their activity.

2.Friend Playlist Challenge:

Allow users to create a playlist with friends and challenge each other to add songs. This encourages users to return to the app and interact with others.

3.Weekly Listening Rewards:

Give users badges or rewards for completing listening goals, such as discovering 10 new artists in a week. This can motivate users to explore more music and spend more time on the app.

LEAD GENERATION PROCESS

1.Design a landing page mockup (using Canva or Figma) for a Zomato-style offer, highlighting a special deal and a clear call-to-action button for users to sign up with their email.

Landing Page Mockup – Food Delivery Offer

FOODIEGO

Delicious Food. Amazing Offers. Delivered Fast!

GET 50% OFF YOUR FIRST ORDER!

Discover your favourite restaurants and get delicious meals delivered directly to your doorstep.

Special Launch Offer:
Up to 50% OFF
Fast Delivery
Thousands of Food Choices

Get Early Access

Enter your email:

GET MY OFFER

Limited-time launch offer. Sign up today!

2.List 3 different lead magnets you could use to attract users for a music streaming app like Spotify (for example: free trial, exclusive playlist, discount coupon), and explain in one line how each would collect user info.

Lead magnet	How it collect user information
Free trial	Users enter their email address and create an account to receive a limited free subscription
Exclusive playslist	Users provide their email or sign up for an account to unlock special playlists.
Discount coupon	Users enter their email address to receive a discount code for a premium subscription

3.Write a short WhatsApp message template you could use to follow up with a lead who filled out your form for a cricket IPL fantasy league app — include a greeting, mention the app, and a call to action.

WhatsApp Follow-Up Message for an IPL Fantasy League App:

IPL Fantasy League Follow-Up

Hi! Thanks for showing interest in our IPL Fantasy League app!

Create your fantasy team, choose your favourite players, and compete with other cricket fans.

Sign up now and get ready for the next match!

Good luck and enjoy the game!

**4.Use ChatGPT or any AI writing tool to generate 5 catchy headlines for a Flipkart-style landing page aimed at collecting leads for a new electronics sale.

Hint: Give the AI a prompt like 'Write 5 headlines to attract users to sign up for early access to a big online electronics sale.'**

Five Catchy Headlines for an Electronics Sale Landing Page

1. Get Early Access to the Biggest Electronics Sale!
2. Be the First to Unlock Amazing Electronics Deals!
3. Exclusive Deals Are Coming – Sign Up Now!
4. Save Big on Your Favourite Electronics – Join the List!
5. Sign Up Today for Early-Bird Electronics Offers!

SEARCH ENGINE BASICS

1.Open Google and search for 'best pizza places in Ahmedabad'. Write down the top 3 websites that appear in the search results and note if any of them are ads or organic results.

Website	Type of result
Tripadviser	Organic result
wanderlog	Organic result
Swiggy Dineout	Organic result

2.Pick any one of your favorite apps (like Zomato, Flipkart, or BookMyShow) and visit their official website. Identify and list 5 keywords you think users might search on Google to find this website.

Website/App: Flipkart

Possible Google search keywords are:

1. Flipkart
2. Flipkart online shopping
3. Buy products online Flipkart
4. Flipkart offers
5. Flipkart electronics

These keywords could help users find the Flipkart website when they are looking for online shopping, products, or special offers.

**3.Search for 'buy wireless headphones online' on Google. Analyze the first page of results and count how many are e-commerce sites, blogs/review sites, and ads. Present your findings in a simple table.

Hint: Look for small 'Ad' labels and check the URLs to distinguish between e-commerce and blogs.**

Result type	**Approx number**	**Example**
E-commerce websites	6	Flipkart, Amazon, Croma, Reliance Digital, etc.
Blogs/Review websites	2	Technology/product review websites
Aid/Paid results	2	Sponsored shopping/product advertisements
Total	10	First-page results

4.Explain in your own words the difference between a search engine and a web browser. Give two examples of each, using brands or apps you have used.

Search Engine

A search engine is an online service that helps users find information and websites on the internet by entering keywords.

Examples:

- Google Search
- Bing

Web Browser

A web browser is an application used to open and view websites on the internet.

Examples:

- Google Chrome
- Microsoft Edge

Simple Difference

Search Engine = Helps you FIND websites.
Web Browser = Helps you OPEN and USE websites.

Example: You can open Google Search using Chrome, search for “Flipkart,” and then open the Flipkart website.

INTRODUCTION TO SEO

1.Open the homepage of your favorite food delivery app (like Zomato or Swiggy) and identify the main elements (title, headings, images, links) that you think help it appear in Google search results. List at least 5 elements and explain why each might be important for SEO.

1. Page Title: The page title tells search engines what the website is about. A title like "Zomato – Order Food Online" helps users understand the website's purpose.

2. Main Heading (H1): A clear heading explains the main topic of the page. It helps search engines understand the content and structure of the website.

3. Images and Alt Text: Attractive food images make the website more appealing. Adding descriptive alt text helps search engines understand the images.

4. Internal Links: Links to restaurant pages, food categories, and special offers help users navigate the website and allow search engines to discover other pages.

5. Meta Description: A short description summarizes the webpage and can encourage users to click the website when it appears in Google search results.

**2.Write an SEO-friendly title and meta description for a Flipkart product page selling wireless headphones. Make sure your title is under 60 characters and your description is under 160 characters.

Hint: Think about what keywords a user would search for and include them naturally**

SEO Title (under 60 characters):

Buy Wireless Headphones Online at Flipkart

Meta Description (under 160 characters):

Shop wireless headphones on Flipkart. Explore Bluetooth headphones with great sound, compare prices, and discover exciting deals on top brands.

Why is it SEO-friendly?

- It includes relevant keywords such as "wireless headphones" and "Bluetooth headphones."
- It clearly describes the product and encourages users to visit the page.

4.Use ChatGPT or any AI tool to generate a list of 10 keywords someone might use to search for the latest IPL cricket highlights. Paste the list and pick the top 3 keywords you would use in your own blog post title.

Ten Keywords for the Latest IPL Cricket Highlights

1. IPL highlights
2. Latest IPL match highlights
3. IPL highlights today
4. IPL cricket match highlights
5. IPL full match highlights
6. IPL batting highlights
7. IPL bowling highlights
8. IPL best moments
9. IPL match results and highlights
10. IPL highlights in Hindi

Top 3 Keywords for My Blog Post Title

1. IPL highlights
2. Latest IPL match highlights
3. IPL highlights today

RANKING FACTOR

1.Pick any product page from Flipkart or Amazon and list 5 on-page elements that you think help it rank higher in Google search results. For each, write one line on why it matters for ranking.

Example: Flipkart wireless headphones product category page

1. Product Title: A clear title containing keywords such as “wireless headphones” helps Google understand the product and match it with relevant searches.

2. Product Description: Detailed information about sound quality, battery life, and Bluetooth connectivity helps search engines understand the page content.

3. Product Images and Alt Text: High-quality product images attract customers, while descriptive alt text helps search engines understand the images.

4. Customer Ratings and Reviews: Reviews provide useful information about products and help shoppers make informed decisions.

5. Internal Links: Links to related products, brands, and categories help users discover more products and help search engines find other pages.

2.Create a table comparing 5 different ranking factors (like page speed, mobile-friendliness, keyword usage, backlinks, and user reviews) and rate their importance for a food delivery app like Zomato. Use 'High', 'Medium', or 'Low' for each.

Ranking Factor	Importance	Reason
Page speed	High	Fast-loading pages improve the user experience and support good search performance.
mobile-friendliness	High	Many customers search for restaurants and order food using mobile phones.
Keyword usage	High	Relevant keywords help search engines understand restaurant pages and food-related content.
Backlink	High	Links from relevant, trustworthy websites can help search engines discover pages and assess their reputation.
User Reviews	Medium	Reviews help customers choose restaurants and provide useful, original content on restaurant pages.

3.Analyze the homepage of BookMyShow and identify 3 ranking factors that could be improved to boost its SEO. Suggest one practical change for each factor.

Three SEO Improvements for BookMyShow:

1. Page Speed: Large banners and event images may slow down pages. BookMyShow could compress images and optimize scripts to improve loading speed.

2. Keyword Optimization: Event pages could use clear titles and headings containing relevant terms such as “movies in Ahmedabad” or “upcoming concerts in Mumbai” to match local searches.

3. Structured Data: BookMyShow could use appropriate structured data for eligible event pages to help search engines understand event details, such as dates, locations, and ticket information

These improvements can support discoverability and usability, although they do not guarantee higher rankings.

**4.Use ChatGPT or any AI tool to generate a checklist of 10 ranking factors for optimizing an Instagram profile page for search engines. Submit the checklist and highlight any 2 factors you didn't know before.

Hint: Ask the AI tool for 'SEO ranking factors for social media profile pages'.**

Checklist of 10 SEO Factors for an Instagram Profile

Use this checklist to optimize a public Instagram profile for search visibility.

- 1. Username: Choose a simple, memorable username related to the brand or topic.
- 2. Profile Name: Include the brand name or a relevant descriptive keyword.
- 3. Bio Keywords: Naturally include words describing the account's content or services.
- 4. Profile Picture: Use a clear logo or recognizable image.

- 5. Public Profile: Keep the profile public if you want its content to be discoverable.
- 6. Captions: Write descriptive captions using relevant keywords.
- 7. Hashtags: Use a small set of relevant hashtags that accurately describe each post.
- 8. Alt Text: Add descriptive alt text to images where the feature is available.
- 9. Website Link: Add a relevant website link to help visitors find more information.
- 10. Engagement and Quality: Publish useful, original content that encourages genuine interaction.

Two Factors I Didn't Know Before

- **1. Image Alt Text**: I learned that adding descriptive alt text can help explain the contents of an image to people using screen readers and provide additional context about the image.
- **2. Profile Name Keywords**: I learned that the Instagram profile name can include relevant descriptive words, making it easier for people to recognize an account and potentially find it through searches

AI BASED MARKETING PLANNING FRAMEWORK

1.Pick any one of your favorite apps (such as Zomato, Instagram, or Flipkart) and outline a basic digital marketing plan using an AI-based marketing planning framework — include target audience, main marketing channels, and one AI-powered tool you would use for campaign optimization.

Digital marketing plan for Zomato using an AI-based marketing planning framework

Selected app: Zomato

Objective: Increase app downloads, food orders, customer engagement, and repeat purchases using AI-powered marketing.

components	Digital Marketing plan
Target audience	College students, working professionals, and families aged 18–40 who order food online
Main marketing channels	Instagram, Facebook, Google Ads, email marketing, push notifications, and influencer marketing.
Content strategy	Food reels,restaurant discounts,customer reviews and food-related memes.
AI-powered tool	Google analytics with AI-powered insights and predictive metrics
Campaign optimization	Analyze customer behaviour,identify high-performing campaigns and use predictive insights to improve audience targeting and marketing decisions.
Key performance indicators(KPIs)	App downloads,click-through rate,conversion rate,repeat orders.

**2.Use ChatGPT or any AI tool to generate 5 unique content ideas for a new product launch campaign for a food delivery app like Swiggy.

Hint: Try prompts like 'Suggest 5 creative digital marketing campaign ideas for launching a new feature on a food delivery app targeting college students.'**

Idea 1: Campus Hunger Challenge

Create Instagram Reels showing students getting hungry between lectures and ordering their favorite meals.

Platform: Instagram Reels · CTA: Download the app

Idea 2: Student Budget Meals

Promote affordable meal combos and special student offers through carousel posts and short videos.

Platform: Instagram and Facebook · CTA: Explore meal deals

Idea 3: Order Together, Save Together

Launch a group-order feature campaign where friends can combine orders and receive an eligible group discount.

Platform: Instagram Stories and WhatsApp sharing · CTA: Start a group order

Idea 4: Guess the Dish

Publish food close-ups and ask followers to guess the dish. Winners can receive discount coupons.

Platform: Instagram Stories · CTA: Participate now

Idea 5: Your Food Mood

Use an AI-powered quiz or interactive campaign to recommend meals based on mood, food preferences, and budget.

Platform: App, website, and Instagram · CTA: Find your perfect meal

3.Create a simple customer journey map for a user booking a movie ticket on BookMyShow, and highlight at least two touchpoints where AI-based marketing interventions (like personalized offers or chatbots) can be used.

Customer journey stage	Customer action	Touchpoint	AI-based marketing intervention
Awareness	Discovers a new movie	Instagram ads,youtube ads	AI identifies audience interests and helps target relevant movie advertisements
Consideration	Checks movie details and showtime	BookMyshow app or website	AI recommends movies based on viewing interests and previous

			interactions
Selection	Chooses a cinema,showtime and seats	Booking interface	AI chatbot answers questions about showtimes, seating, and booking steps.
Purchase	Pays for the ticket	Checkout page	AI can personalize eligible offers based on customer preferences and campaign rules
Post purchase	Receives confirmation	Emails,SMS,app notifications	AI helps send relevant reminders and recommends similar upcoming movies.

Two important AI marketing touchpoints

- Personalized movie recommendations: AI analyzes a user's interests and interactions to recommend relevant movies, increasing the likelihood of a booking.
- AI chatbot assistance: A chatbot answers common booking questions quickly and helps customers move toward completing their purchase.

**4.Imagine you are working for a music streaming app like Spotify. List 3 ways you could use AI-driven analytics to improve user engagement through digital marketing campaigns.

Hint: Think about personalized recommendations, optimal notification timing, or predicting churn.**

Three ways to use AI-driven analytics for a Spotify-like music streaming app

1. Personalized music recommendations

AI analyzes listening history, favorite genres, and skipped tracks to recommend songs, artists, and playlists. Marketing campaigns can promote personalized playlists to increase listening time and engagement.

2. Optimize notification timing

AI analyzes engagement patterns to estimate when users are most likely to open the app. The marketing team can schedule relevant notifications about new releases, personalized playlists, or favorite artists at suitable times.

3. Predict customer churn

AI identifies patterns associated with declining engagement, such as fewer listening sessions or reduced playlist activity. The app can test re-engagement campaigns, such as a personalized playlist or a reminder about new music, to encourage users to return.

USING CHATGPT FOR MARKETING STRATEGY CREATION

1.Sign up for a free ChatGPT account and ask it to generate a basic digital marketing strategy outline for a new food delivery app targeting college students.

App name: Foodie Express

Target audience: College students aged 18–25 who want affordable and convenient food delivery.

Marketing objective: Increase app downloads, attract new customers, and encourage repeat orders.

Strategy element	plan
Target audience	College students, hostel residents, and young adults
Social media marketing	Share food reels, memes, student offers, and customer reviews on Instagram
Paid advertising	Run targeted Instagram and Google Ads to reach students
Influencer marketing	Collaborate with local food bloggers and college influencers
Promotional offers	Provide first-order discounts, referral rewards, and

	affordable meal combos
Content marketing	Publish food guides, budget meal ideas, and restaurant recommendations
AI-powered tool	Use ChatGPT to generate content ideas and Google Analytics 4 to analyze user behavior
KPIs	App downloads, website visits, conversion rate, and repeat orders

**2.Use ChatGPT to brainstorm 5 unique Instagram campaign ideas for a local fashion boutique aiming to attract Gen Z customers.

Hint: Try prompts like 'Suggest creative Instagram campaign ideas for a trendy clothing store targeting 18-22 year olds.'**

Business name: Trendy Threads Boutique
Target audience: Gen Z customers aged 18–22.

1. #StyleYourWay Challenge

Encourage followers to create reels styling one boutique item in three different ways.

Goal: Increase engagement and user-generated content.

2. One Outfit, Three Looks

Create reels showing how one top or pair of jeans can be styled for college, casual outings, and parties.

Goal: Showcase product versatility and attract potential buyers.

3. Guess the Price

Post an outfit and ask followers to guess its price before revealing the actual price in Stories.

Goal: Increase Story interactions and product awareness.

4. Bestie Shopping Day

Invite customers to share their shopping experiences with friends and tag the boutique. Feature selected posts with permission.

Goal: Encourage word-of-mouth promotion and reach new audiences.

5. New Drop Countdown

Share sneak peeks, polls, and countdown stickers before launching a new collection.

Goal: Build anticipation and drive store visits or online orders.

3.Give ChatGPT a description of a fictional music streaming app and ask it to create a 7-day content calendar for launching the app on social media.

Day	Content idea	Playform	caption
Day 1	App launch announcement	instagram,face book	“Meet MelodyMix! Your next favorite song is waiting. Download now!”
Day 2	Teaser reel featuring popular music genres	Instagram reel	“What’s your vibe today? Pop, hip-hop, or chill?”
Day 3	Personalized playlist preview	Instagram stories	“Discover music that matches your mood.

			Try MelodyMix!”
Day 4	Music quiz and poll	Instagram stories	“Guess the genre! Test your music knowledge.”
Day 5	Behind-the-scenes app development	instagram ,facebook	“Here’s how we’re making music discovery easier for you.”
Day 6	User-generated content challenge	Instagram reels	“Share your current favorite song and tag MelodyMix!”
Day 7	Launch-week offer or feature highlight	instagram ,facebook	“Your music journey starts here. Explore MelodyMix today!”

**4.Use ChatGPT to write a sample WhatsApp promotional message for a new IPL cricket fantasy league app, then edit the result to make it more engaging for your friends.

Constraint: Final message must be under 40 words and include an emoji.**

WhatsApp promotional message for an IPL fantasy league app

🏏 IPL fever is here! Pick your dream team, challenge your friends, and see who knows cricket best. 🔥 Join our fantasy league and let the fun begin!

5.Compare two different marketing strategy outlines generated by ChatGPT for a new online movie ticket booking service: one using the prompt 'Create a digital marketing plan for a startup' and another using 'Create a digital marketing plan for a startup like BookMyShow targeting college students.' List 3 key differences and explain which plan is more suitable for your target audience.

Strategy element	Plan A:general startup	Plan B:BookMyShowlike startup targeting college students
Target audience	General online customer	College students and young movie fans
Social media content	General brand awareness posts	Movie memes, trailers, campus polls, and movie-night reels
Promotional offers	General discounts and offers	Student deals, group-booking offers, and weekday movie promotions
Influencer marketing	General industry influencer	College creators, campus ambassadors, and local entertainment influencers
Marketing channels	Websites,emails,google ads and social media	Instagram, YouTube, student communities,

		Google Search, and push notifications

Three key differences

1. Target audience: Plan A targets a broad audience, while Plan B focuses specifically on college students and young moviegoers.

2. Content strategy: Plan A uses general promotional content, whereas Plan B uses relatable movie memes, trailers, campus trends, and interactive polls.

3. Promotional approach: Plan A offers general discounts, while Plan B focuses on relevant student offers and group movie bookings.

Which plan is more suitable?

Plan B is more suitable because it focuses on the interests, online habits, and entertainment preferences of college students. Student-focused promotions, relatable social media content, and group-booking offers can help the startup build awareness, attract first-time users, and encourage repeat bookings.

CUSTOMER PERSONA AND FUNNEL MAPPING USING AI

1.Pick any one app you use daily (such as Zomato, Instagram, or Flipkart) and create a basic customer persona for it, including age, location, interests, and digital habits.

Selected app: Instagram

Meet Riya Sharma,,Fictional customer persona

Student · Social media user

Age:20 years location:Ahmedabad

Interests

- Fashion, music, food, and travel
- Reels, memes, and photography
- Following creators and friends

Digital habits

- Uses Instagram daily on a smartphone.
- Watches Reels and Instagram Stories.
- Follows influencers and local businesses.
- Shares posts with friends and responds to polls.

Goals and needs

Wants entertainment, social connection, and inspiration for fashion, food, and lifestyle.

Marketing opportunity

Reach her through relatable Reels, creator collaborations, interactive Stories, and personalized content.

2.Map out a simple customer journey funnel for a Swiggy user — list the key stages from discovering the app to placing their first food order, and briefly describe what the user does at each stage.

Objective: Understand how a potential customer discovers Swiggy and completes their first food order.

Stage 1: Awareness

The user discovers Swiggy through Instagram ads, Google searches, or recommendations from friends.

Marketing action: Run social media ads highlighting convenient food delivery.

Stage 2: Interest

The user visits the website or app store to learn about restaurants, food options, delivery, and offers.

Marketing action: Share appealing food photos, restaurant options, and introductory offers.

Stage 3: Consideration

The user compares prices, menus, ratings, delivery times, and available discounts.

Marketing action: Display relevant restaurant recommendations and eligible discounts.

Stage 4: Conversion

The user selects food, adds items to the cart, enters delivery details, and completes payment or places the order.

Marketing action: Make checkout simple and clearly display the total price and available offers.

**3.Use ChatGPT or any AI tool to generate three different customer personas for a new music streaming app targeting college students in India. Copy the personas into your assignment and highlight one insight you found interesting.

Hint: Try prompts like 'Create a custome**r persona for a college student who loves music apps in India.'

Fictional app: MelodyMix
Target audience: Indian college students who listen to music for entertainment, relaxation, and social activities.

Persona 1: The Trend Follower

Aarav — Age 19

Location: Ahmedabad, Gujarat

- Interests: Bollywood hits, Punjabi songs, trending music, and reels.
- Digital habits: Uses Instagram daily and discovers songs through short videos.
- Needs: Wants trending songs and ready-made playlists.
- Marketing approach: Promote trending playlists through Instagram Reels and creator collaborations.

Persona 2: The Focused Student

Priya — Age 21

Location: Pune, Maharashtra

- Interests: Lo-fi music, instrumental tracks, and soft acoustic songs.
- Digital habits: Uses music apps while studying and prefers uninterrupted playlists.
- Needs: Wants relaxing music and easy playlist discovery.
- Marketing approach: Share study playlists and promote focus-music collections during exam periods.

Persona 3: The Social Music Lover

Kabir — Age 20

Location: Mumbai, Maharashtra

- Interests: Hip-hop, indie music, party songs, and discovering new artists.
- Digital habits: Shares songs with friends and listens to music during travel and social gatherings.
- Needs: Wants collaborative playlists and easy music sharing.
- Marketing approach: Promote shared playlists, friend challenges, and new-artist discovery campaigns.

Interesting insight

The most interesting insight is that college students may use the same music app for very different purposes. One wants trending songs, another wants concentration, and another wants to share music socially.

Therefore, MelodyMix should use personalized playlists and audience-specific campaigns instead of sending the same promotional message to every user.

4.Draw or digitally sketch a funnel diagram for a BookMyShow-like app, labeling each stage (Awareness, Interest, Consideration, Conversion, Loyalty), and write one digital marketing action you would take at each stage to move users forward.

Objective: To guide users from discovering the movie ticket booking app to becoming loyal customers.

1. Awareness: Users discover the app through social media, advertisements, or YouTube movie trailers. Marketing Action: Run Instagram and YouTube ads to promote upcoming movies and the app.

2. Interest: Users explore movie details, trailers, cinema locations, and showtimes. Marketing Action: Share engaging movie trailers, upcoming release updates, and interactive quizzes.

3. Consideration: Users compare ticket prices, showtimes, cinema locations, and available offers. Marketing Action: Provide personalized movie recommendations and relevant discounts.

4. Conversion: Users select their seats, enter booking details, and complete the ticket purchase. Marketing Action: Simplify the booking and payment process and display available offers clearly.

5. Loyalty: Users return to the app to book tickets for future movies. Marketing Action: Send personalized movie recommendations, booking reminders, and loyalty rewards.

CAMPAIGN IDEAS AND CONTENT BRIEF GENERATION USING CHATGPT

1.

Use ChatGPT to generate 5 creative campaign ideas for promoting a new food delivery app targeting college students in Ahmedabad.

App name: Foodie Express

Target audience: College students in Ahmedabad who want affordable, convenient, and tasty food.

1. Campus Cravings Campaign: Create Instagram Reels showing students ordering their favourite snacks between lectures. Offer special student discounts to encourage app downloads.

2. Food Under ₹99: Promote budget-friendly meals and snacks through Instagram Stories and carousel posts. Highlight affordable options for students on a budget.

3. Ahmedabad Food Hunt: Create content featuring popular local favourites such as dabeli, Gujarati snacks, sandwiches, and pav bhaji. Encourage students to discover local food through the app.

4. Refer Your Friend: Launch a referral campaign where students can receive eligible rewards when their friends sign up and place their first order.

5. Late-Night Hunger Challenge: Promote late-night food options for students studying for exams or relaxing in hostels. Use funny memes and relatable Reels to attract attention.

**2.Pick any one of your favorite brands (like Myntra, Zomato, or Spotify) and ask ChatGPT to create a content brief for an Instagram Reel campaign to increase engagement among Gen Z users.

Hint: Specify the campaign objective, target audience, and preferred content format when prompting ChatGPT.**

Brand: Zomato

Campaign name: POV: Your Food Mood Is Calling!

Campaign objective: Increase Instagram engagement among Gen Z users through relatable, humorous food content.

Target audience: Young people aged 18–25 who enjoy food, social media trends, and ordering online.

Content format: 15–30 second Instagram Reel.

Content idea:

- **Scene 1**: A student says, "I'll eat healthy today!"
- **Scene 2**: Their friend shows them a delicious burger or pizza.
- **Scene 3**: The student immediately changes their mind and starts browsing food options.
- **Scene 4:** End with a humorous food-related caption and a prompt asking viewers to comment on their favourite comfort food.

Caption: "Healthy eating starts tomorrow. Today, we're following our cravings! What's your comfort food?"

Hashtags: #Zomato #FoodieMood #GenZFoodies #FoodReels #FoodCravings

Call to action (CTA): "Comment your favourite comfort food and tag your foodie partner!"

Expected result: More comments, shares, Reel views, and interaction with the brand.

3.

Refine a campaign idea by asking ChatGPT to suggest catchy slogans and hashtags for a Flipkart Diwali sale campaign aimed at young shoppers.

Campaign name: Diwali Shopping, Full-On Savings!

Slogan ideas

1. “Light Up Your Diwali, Not Your Expenses!”
2. “Big Festive Vibes, Bigger Savings!”
3. “Diwali Ka Scene, Shopping Supreme!”
4. “Your Wishlist, Your Diwali, Your Deals!”
5. “Festive Looks, Gadgets & Gifts — Sab Kuch Flipkart Se!”

Hashtag ideas

- #FlipkartDiwaliSale
- #DiwaliShopping
- #FestiveSavings
- #DiwaliDeals
- #ShoppingWaliDiwali
- #FestiveVibes
- #WishlistToReality

Hashtags: #FlipkartDiwaliSale #ShoppingWaliDiwali #FestiveSavings

Campaign execution: Create Instagram Reels showcasing festive outfits, gadgets, home décor, and gift ideas. Use countdown Stories and product wishlists to encourage young shoppers to explore the sale.

**4.Take a campaign idea generated by ChatGPT and manually edit the content brief to better fit the Indian youth market (language, references, or tone).

Constraint: Highlight at least 2 changes you made and explain why.**

Original AI-generated campaign idea: Promote a food delivery app through a Reel showing a student ordering food during a study break.

Refined campaign content brief

Campaign name: Padhai Ka Break, Foodie Treat!

Objective: Increase app awareness and encourage first-time food orders among college students in Ahmedabad.

Target audience: College students aged 18–25, especially hostel residents and students who frequently order snacks and meals.

Content format: A 20–30 second Instagram Reel using humour, Hinglish, and relatable college-life situations.

Reel concept:

1. A student is studying for exams and says, "Bas ek chapter aur!"
2. Their stomach growls, and they lose concentration.
3. They open the food delivery app and order their favourite snack.
4. The Reel ends with the students enjoying their food and returning to their studies.

Caption: "Assignments ka pressure? Exams ka tension? Padhai ke beech ek tasty break toh banta hai! Order your favourites with Foodie Express."

Hashtags: #AhmedabadFoodies #CollegeLifeIndia #PadhaiKaBreak #FoodieExpress #StudentLife

CTA: “Download the app and explore student-friendly food deals!”

Two key changes and why I made them

1. Changed the language to Hinglish. I added phrases such as “Padhai ka break” and “ek tasty break toh banta hai” because they sound conversational and relatable to many Indian college students.

2. Added an Indian college-life reference. I used exams, assignments, and study breaks instead of a generic food-ordering scene because these situations are familiar to the target audience.

3. Included local relevance. I added the hashtag `#AhmedabadFoodies` to make the campaign more relevant to students in Ahmedabad and support local audience discovery.
